## **A unique glimpse into the future of china**

Figgjo Front collects Figgjo's most innovative products developed to create and capture the latest trends, meeting the needs of the professional kitchen to present food in new and surprising ways.

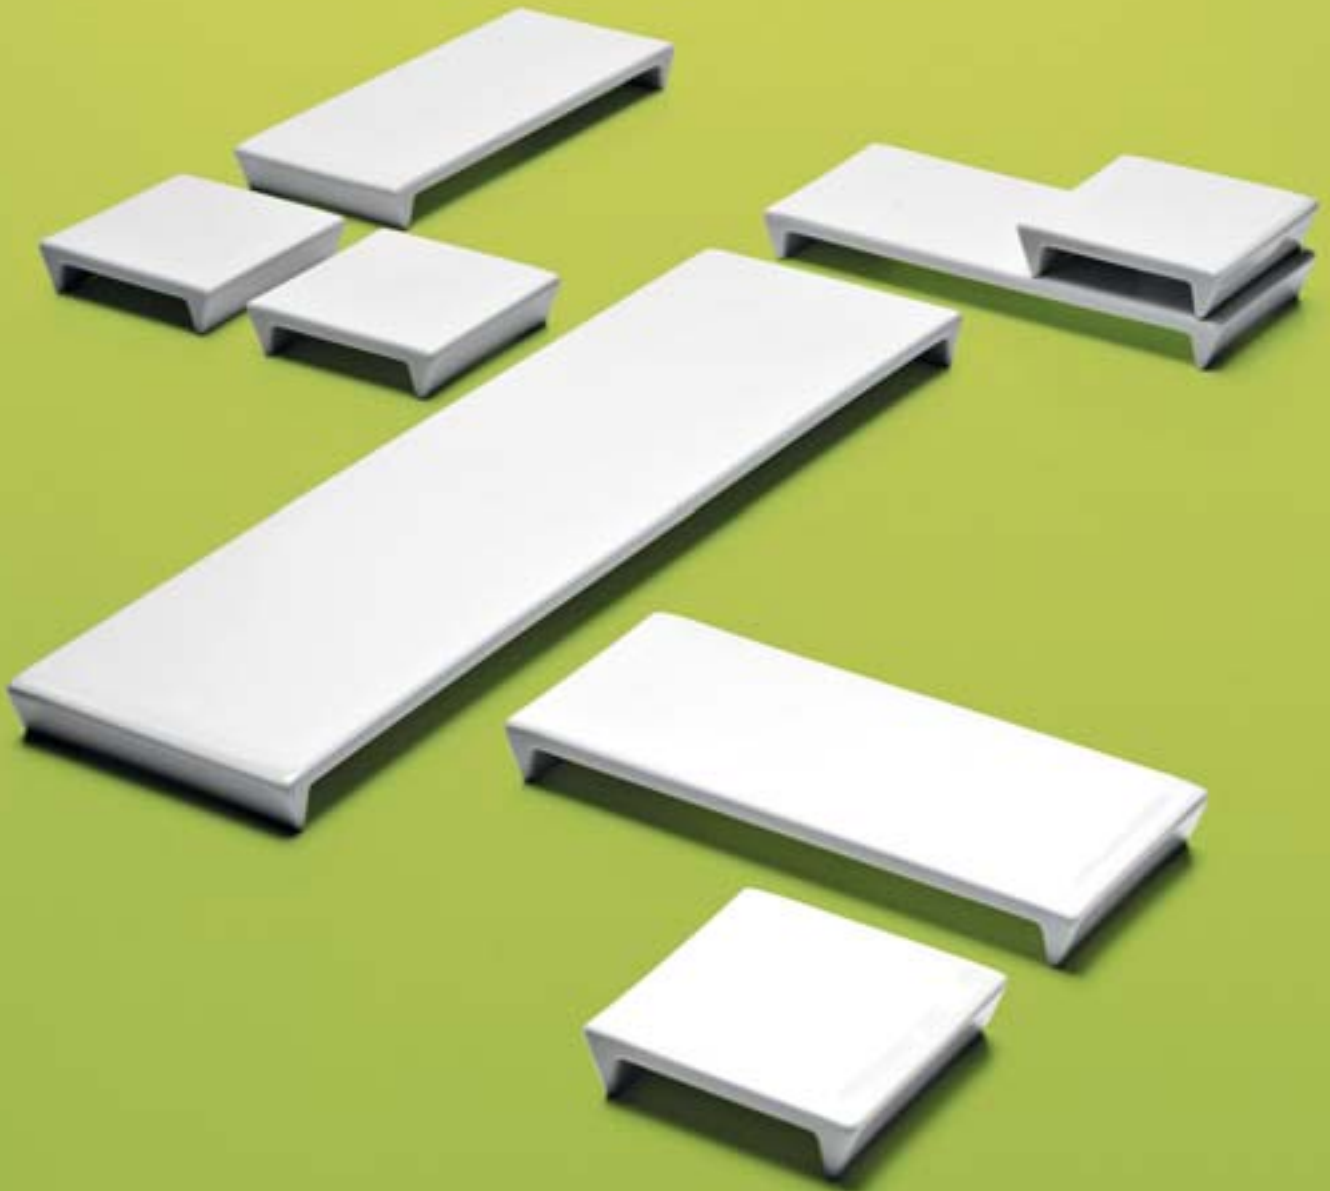

Figgjo Front's range of unique design pieces allow for a limitless expression of your creativity. Figgjo Front is the most dramatic member of the ever-extending Figgjo family, and defies traditional definitions of a china series.

Consisting solely of cutting edge pieces developed as stand-alone items and in groups, Figgjo Front can be considered more as a presentation concept than simply a design line. Each individual product can function by itself, or work together with other products from Figgjo Front or other Figgjo series. Figgjo Front can fit in and add vibrancy to an incredibly wide selection of chinaware constellations. Any installation gets an immediate lift with the addition of the latest expressions from the world's leading chinaware designer. Figgjo Front has a life of its own.

The series is constantly being developed and updated as new trends appear. Figgjo Front is designed by Constance Gaard Kristiansen, Olav Joa, Jens Olav Hetland and Sebastiano Cossia Castiglioni with inspiration from the most innovative chefs.
